

Acknowledgements

This study was carried out at the ecological farm of the Faculty of Agriculture, National University of Laos, Vientiane, Laos, during 2004, with a grant from the Swedish International Development Cooperation Agency, Department for Research Cooperation (Sida – SAREC), through the regional MEKARN Project. I am very grateful to their support for this study.

I would like to thank the Faculty of Agriculture, National University of Laos, Vientiane, Laos, for allowing me study leave and helping me to carry out the studies.

I would like to express my sincere gratitude to Associate Professor, Dr Brian Ogle, my supervisor, the director of the MSc course, for his kind, support, professional guidance, and advice in many different ways.

I would also like to thank Associate Professor Dr. Inger Ledin, of the Department of Animal Nutrition and Management, Swedish University of Agricultural Sciences, for her scientific guidance and warm heart during the MSc course.

My sincere thanks to all Professors, doctors and lecturers who provided me with useful knowledge during the course.

My sincere thanks to Dr. Luu Trong Hieu, the regional consultant of the Sida-MEKARN project, Dr Ngo Van Man, the regional coordinator of the Sida-MEKARN project, Dr Bounthong Bouahom, the director of National Agriculture and Forestry Research Institute of Laos (NAFRI) and Dr Thongphanh Kousonsavath, the Dean of the Faculty of Agriculture of the National University of Laos, for their help and encouragement.

I would like to thank the Feed Analysis Laboratory of the Department of Livestock and Fisheries of the Ministry of Agriculture and Forestry for analysis of samples.

Special thanks to Prof. Dr. Metha Wanapat and his staff of the Animal Science Nutrition Laboratory of Khon Khaen University, Thailand, for helping with the analyses.

Many thanks to my classmates in the MSc course for their contributions, suggestions and friendship during the course.
